## Business-grade Global Network Connectivity

### Extend Your Network, Extend Your Reputation

As use cases continue to grow for quality global connectivity, more enterprises and service providers are adopting satellite services. For business-grade solutions, this means being able to extend consistent connectivity to every location, support resilient hybrid cloud and SD-WAN deployments, and drive the best application performance for users.

**The right satellite solution combines global coverage and resilient service with design and operational support that integrates with the way Tier-1 operators do business.**

### FlexEnterprise: Your Global Enterprise Connectivity Fabric

With FlexEnterprise, you're ready to leverage the world's largest integrated satellite and terrestrial network, with support that meets your business needs, to deliver quality service to virtually any location on the globe.

**Quickly bring up new sites** to extend access to the public internet, private networks, or cloud services

**Take advantage of expert design**, integration, and ongoing operational service with 24x7 NOC availability

**Increase application and site availability** regardless of the state of the local telecom infrastructure

**Improve application performance** with diverse paths for traffic separation and app-specific routing

**Leverage options for lower-latency** LEO (low-Earth orbit) and high-reliability GEO (geosynchronous orbit) connectivity

Pre-packaged FlexEnterprise Unlimited Plans make it easy for service providers to integrate the benefits of the seamless global Flex network into their solutions without the need to manage wholesale satellite capacity.

### Benefits At-A-Glance

- Power new locations without the time or cost associated with new fiber, microwave, or other terrestrial deployments
- Satellite-as-a-service plans to integrate the global Flex network into your end-to-end solutions
- No wholesale commitments
- Resilient high-throughput capacity to individual sites, a multi-country region, or globally
- Deliver access to the public internet, extend private networks, or securely connect to the cloud with IntelSat Cloud Connect
- Options for GEO and LEO connectivity

## Order Up Global Connectivity

With minimal capital costs and no capacity commitments, Intelsat's array of satellite-as-a-service options enables you to quickly deploy new sites and strengthen established sites across a global footprint. You'll easily harness the reach and reliability of FlexEnterprise connectivity to put the network where your users need it.

With FlexEnterprise you can:

### Meet Customer Expectations for Both Service and Support

With design and integration support, in-country teams, and 24x365 live NOC support, you can extend your customers' experience with service that meets your operational needs.

### Increase Branch Office Resiliency

Reduce the business and productivity impacts of network downtime when you integrate the diverse, non-terrestrial Flex underlay network into your connectivity solutions. FlexEnterprise is unaffected by local telecom infrastructure issues.

### Expand Geographic Availability and Reduce Time to Deploy New Sites

In areas still being built out with fiber or cellular infrastructure, Flex provides a "first in" solution so that you can quickly bring up new sites without waiting.

### Improve Application Performance

Enhance SD-WAN benefits that leverage the performance of diverse transport networks. FlexEnterprise provides a unique path for traffic separation and application-specific routing to maintain the performance of critical enterprise traffic.

## Deliver More to Your Users

FlexEnterprise helps you streamline operations and deployment processes thanks to simple plans, uniform performance across the global Flex GEO and Flex LEO footprints, and enterprise-grade support. It's now easier than ever to make your network nimble and scalable, delivering a new level of reach, performance, and flexibility to support critical applications and drive business productivity.

## About Intelsat

Intelsat's global team of professionals is focused on providing seamless and secure, satellite-based communications to government, NGO and commercial customers through the company's next-generation global network and managed services. Bridging the digital divide by operating one of the world's largest and most advanced satellite fleet and connectivity infrastructures, Intelsat enables people and their tools to speak over oceans, see across continents and listen through the skies to communicate, cooperate and coexist. Since its founding six decades ago, the company has been synonymous with satellite-industry "firsts" in service to its customers and the planet. Leaning on a legacy of innovation and focusing on addressing a new generation of challenges, Intelsat team members now have our sights on the "next firsts" in space as we disrupt the field and lead in the digital transformation of the industry.
