

FlexMaritime Vantage

High-speed Connectivity for Maritime Vessels

Higher Speeds to Meet Greater Demand

The commercial maritime industry is changing rapidly, accelerated by trends in decarbonization, internet-of-things (IoT), cybersecurity, AI, robotics, remote training and crew welfare. To address these industry pressures, companies and operators in merchant shipping and commercial fishing are expanding their digitalization strategies to include advanced satellite connectivity services that can support fluctuating throughput demands, ensuring shore-like connections for vessels and crews at sea, often for long periods of time.

FlexMaritime Vantage complements IntelSat's flagship FlexMaritime service by adding a layer of higher speed coverage in high-traffic areas, enabling network connectivity speeds up to 60 Mbps download and 6 Mbps upload.*

FlexMaritime Vantage High-speed Multi-layered Coverage

Combined FlexMaritime Services Multi-layered Coverage

*FlexMaritime Vantage coverage and speeds vary by terminal type and region.

Network speeds up to 60 Mbps download and 6 Mbps upload where FlexMaritime Service is offered

Available for existing and newly qualified 60cm+ antennas

Complements existing FlexMaritime global service with higher-speed coverage in high-traffic areas

Powered by IntelSat's high-throughput, secure satellite network with global PoPs and fiber infrastructure

Offered exclusively through IntelSat's qualified solutions partners

The Reliability of FlexMaritime with Higher Speed Connectivity

FlexMaritime Vantage is complementary to Intelsat's award-winning FlexMaritime service.

By integrating FlexMaritime Vantage with FlexMaritime, merchant shipping and commercial fishing owners and operators equip their vessels and crew with reliable high-throughput ship-to-shore communications along with the added benefit of higher speed connectivity in high demand traffic routes.

Enables High-bandwidth Applications in Real Time

- **Artificial Intelligence:** Predictive maintenance, autonomous navigation, route optimization
- **Maritime Decarbonization:** Emissions tracking to improve fuel efficiency and support ESG compliance
- **Maritime Robotics:** To address worker shortages and crew safety
- **Maritime IoT:** Visibility into processes and continuous tracking and monitoring to identify bottlenecks and avoid downtime
- **Cybersecurity:** Countering malicious hackers of networks and connected devices
- **Remote Education and Training:** Mixed media supporting task specific training plus information during maintenance operations

Offered Exclusively Through Intelsat's Solutions Partners

Offered through our carefully selected solutions partners, FlexMaritime Vantage can be seamlessly integrated with their innovative value-added services and world-class support to create the right solution to meet unique business needs.

Powered by Intelsat's Enterprise-grade Network

As the foundational architects of satellite technology, designing global network solutions that fit specific user needs is in our DNA.

About Intelsat

Intelsat's global team of professionals is focused on providing seamless and secure, satellite-based communications to government, NGO and commercial customers through the company's next-generation worldwide network and managed services. Bridging the digital divide by operating one of the world's largest and most advanced satellite fleet and connectivity infrastructures, Intelsat enables people and their tools to speak over oceans, see across continents and listen through the skies to communicate, cooperate and coexist. Since its founding six decades ago, the company has been synonymous with satellite-industry "firsts" in service to its customers and the planet. Leaning on a legacy of innovation and focusing on addressing a new generation of challenges Intelsat team members now have their sights on the "next firsts" in space as they disrupt the field and lead in the digital transformation of the industry.
