

# Flex|Move

## The Evolution of Land Mobile Connectivity

The more remote and bandwidth-hungry your operations are, the greater the need for reliable, affordable Connected Mobility and Portable Connectivity solutions becomes.

Current land mobile services are expensive, low-throughput and unreliable. The result is limited connectivity, operational inefficiency, isolated personnel and restrained innovation. Until now. **FlexMove**, powered by Intelsat's award-winning Epic high-throughput satellite (HTS) fleet—offers the global reach, redundancy and reliability organizations need to support mission-critical applications in the field.

### Not all operations are on the grid

Mining & Rail

Civil Defence/ NGOs & Service Vehicles

Remote Construction

Lone Workers

For operations outside the reach of existing terrestrial networks, FlexMove enables increased operational efficiency and productivity—no matter how challenging or remote the geography is.

**24** GBPS

By 2028, land mobile HTS capacity demand is expected to top **24 Gbps**, up from less than 1 Gbps in 2017. <sup>1</sup>

**\$21.2** BILLION

Land mobile will generate **\$21.2B** in cumulative revenues between 2019 and 2029. <sup>1</sup>

## Hazardous Operations? No problem.

Deliver the unrivaled high-speed connectivity and resiliency of Intelsat's multi-layered Ku-band satellite network.

### Connect with confidence

From autonomous vehicle operation to remote video support and site/worker safety, bandwidth needs are met exactly when and where they're needed.

### Connected Mobility

A vehicle-mounted satellite antenna that automatically acquires a connection and maintains communication while a vehicle is moving.

### Portable Connectivity

Connect on the spot through an easy-to-deploy satellite terminal designed for temporary use in a fixed location.

## Elevate your connectivity experience

Simplify access to complex satellite communications with a fully managed, end-to-end service.

### Faster and more affordable

Flexible gigabyte plans up to 20x faster than existing Mobile Satellite Service (MSS) solutions at a fraction of the cost.

### Hassle-free service delivery

Quickly bring a terminal online without prior in-depth training and establish connectivity in under one minute.

### Pre-configured service plans

Portfolio of certified, easy-to-use terminals designed for rapid deployment.

## Deliver customer value when it matters most
